

HIGH-EMISSIVITY LAYER

The diagram illustrates a cross-section of a multi-layered material. It features a central 'GLASS SURFACE LAYER' containing numerous small, randomly oriented triangles. This central layer is flanked by 'ADHESIVE LAYER's, which are depicted with a repeating interlocking step pattern. The entire assembly is bounded by a solid black layer on the right. A horizontal blue double-headed arrow labeled 'Z' spans the width of the central glass layer. Arrows from the top and bottom text labels point to the top and bottom adhesive layers, respectively.
